Works with	Tungsten carbide, nano-coated and PCD dies
Supplied as	Bagged, on request

What to send for a quote

- Type of lubricant you use now, if any, and whether the line is dry or wet
- Wire material and grade, and the surface condition of the rod: pickled, mechanically descaled, or coated
- Pass schedule: inlet and finished size, number of passes, reduction per pass
- Drawing speed
- Where the wire goes next: galvanising, plating, enamelling, nail making, or finished as drawn
- Monthly quantity, or your current consumption
